How to use this book. Designers read sections 03–12. Your developer starts at section 13. Every file named here is in **Trosheen-Website-Kit-v4.zip**, and every page shown is a working prototype in `13-code/pages/`.

01

WHAT WE HEARD

Your notes, and what this book does about them

Custom workshop lives inside the shop

"Pielāgota darbnīca" leaves the main navigation and becomes the second tab of **Veikals** (`/veikals#darbnica`).

The home page needs a proper structure

A single warm walk in 9 calm sections, each with one job (p. 15–16).

Story needs real thought

Seven chapters with a sticky chapter bar, the family recipe, a corrected timeline and a visit invitation (p. 17).

No buttons or text inside images

Every generated image is text-free and button-free. Headlines and buttons are always real HTML on top.

Warm, welcoming structure

Linen surfaces, arched "doorway" frames, letters and polaroids, generous space, soft corners.

Lotties, animation, effects

37 Lottie files plus v4.1 effects: words that rise in the hero, parallax, photos that open like a door, a strip of piece photos, scroll progress, ornament draws. Calm and reduced-motion safe.

Gallery, Journal & Shop stay

All three stay in the navigation even while empty. They show warm "coming soon" states, never an error.

Only confirmed logos

Only the round T Maker's Seal family from your Brand Kit is used (p. 7).

02 THE SITE TODAY

What we found on trosheen.shop

Read page by page in October 2026. These fixes come first (see the checklist on p. 32).

Navigation

8 items; “Pielāgota Darbnīca” sits beside the shop as its own page.

Home

Hero, an icon strip, two near-identical “Skatīt veikalu” banners, story and newsletter stacked with no flow. Three “An error occurred” messages.

Story (/about)

Strong writing buried in long blocks. Timeline has two 2019 entries. No chapters, no rhythm.

Shop (/shop)

0 pieces, and the empty state sends people away to the workshop page.

Gallery & Journal

Empty with errors. Footers there still show *hello@trosheen.shop* and *+371 20000000*.

Legal pages

Privacy and terms say “Trosheen.Crafts” and are in English on a Latvian site.

Care (/guide)

“100% eco” and “absolute safety” claims; keep them factual and provable.

Sitemap / robots

Both still point to *trosheen.crafts*. They must list *trosheen.shop*.

03 THE IDEA

Mājas pirms veikala: the house before the shop

Visitors should feel they've stepped into the courtyard in Daugavpils: met the family, seen how a piece is born, and only then taken one home.

01

Welcome before you sell

Every page opens like a door: a real photo, a kind sentence, then the pieces.

02

Real, always

Real pieces, real family, real courtyard. Nothing invented, only ever your own photos.

03

One thing at a time

Each section has one job and one main action. No stacked banners.

04

Made by hand, shown by hand

Close-up photos of the real pieces, ornaments that draw themselves, a signature. The site feels made, not templated.

05

Calm motion

Things arrive softly and settle. Nothing bounces, flashes or loops for attention.

04

FOUR PILLARS

Four things that never change

Every page carries at least two of them. Each pillar has its own Latvian sign.

Latvian heritage

Patterns, signs and craft passed down from grandparents. Shown through ornaments, Latvian-first copy and seasonal rhythm.

Our own recipe

A durable stone composite we developed: sculpting gypsum, white cement, microsilica, superplasticiser, reinforcement. Told on Story ch. 3 and Kopšana.

Hand sculpting

Edges, textures and fingerprints shaped by hand while the stone is soft. Shown through close-up photos of each real piece.

Family craft

Three generations in one workshop: Oļegs, the grandparents' skills, Alisija and Nikolass. Shown through letters, polaroids and the signature.

Only the confirmed marks

Taken only from the Trosheen Brand Kit. The round T Maker's Seal stays exactly as it is.

Maker's Seal: primary

Header, footer, favicon source, packaging.

Seal: mono Basalt

One-colour print, stamps, invoices.

Seal: reversed

On Spruce panels and the footer.

T monogram

Favicon, app icon, social avatar.

Horizontal lockup

Website header (Spruce) and footer (Linen).

Web files: transparent SVGs of the same marks (seal Spruce / Linen / Basalt, horizontal lockup Spruce / Linen) are in `02-logos/web-transparent/`. The vector master is in `brand-kit-originals/`.

Never: redraw, recolour, stretch, rotate, add shadows or put the seal on a busy photo. Minimum size: seal 32 px; lockup 120 px wide. Clear space: half the seal's diameter on all sides.

06

LATVIAN ORNAMENTS

Signs that draw themselves

Drawn as single-line SVGs (stroke = currentColor) with matching Lottie "draw" files. Use them small, as eyebrow marks, pillar icons and dividers, never as wallpaper.

Auseklis

Morning star. Welcome, beginnings, the letter.

Saule

Sun. Hand sculpting, newsletter, visits.

Jumis

Harvest. The recipe, the shop.

Krustu krusts

Cross of crosses. Family, protection.

Māras zīme

Water and home. The courtyard, the gallery.

Austras koks

Tree of dawn. Heritage, the timeline, the journal.

JOSTAS RAKSTS (BELT BAND) — SECTION DIVIDER AND FOOTER EDGE

ZALKTIS (GRASS SNAKE) — THIN DIVIDER

Respect note: these are traditional signs. We use them only as ornament with their real names and meanings. No fire-cross (Ugunskrusts) is used anywhere.

07

IMAGERY · PHOTOGRAPHY

Your photos are the heroes

All heroes are made from your own photos. Pieces, people and colours are never altered.

Rule 1: no text, logos or buttons inside images, ever. The website places the real headline and buttons on top, in HTML.

Rule 2: crops only. Heroes 01, 11 and 12 had their edges widened to fit the screen; the original photo sits untouched in the middle. All the others are straight crops.

Rule 3: keep the piece out of the text zone. Text sits bottom-left over a soft Spruce gradient; set `--focus` per photo to protect the piece.

07

IMAGERY · YOUR PIECES

16 real pieces, just as they are

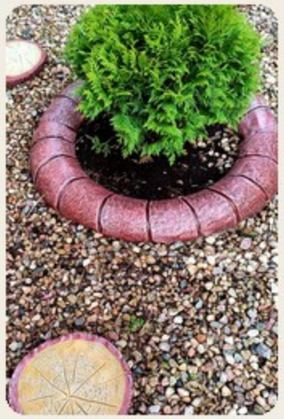

Container candles, design elements and garden elements, each shown in your own photo. No generated art. Crops only. Pieces, colours and surroundings are never altered.

Surfaces taken from your real materials

Seamless tiles at very low contrast, so text always stays readable on top.

Gypsum

Page body (optional `.has-texture`), newsletter card.

Cast stone

Story ch. 3 “Ģimenes recepte” band (`.section--stone`).

Painted finish

Small accents only: product page story card, packaging inserts.

Tile at 560–720 px with `background-blend-mode: multiply` over Linen. Never put a texture behind small text on Spruce.
