WEBSITE IMPLEMENTATION GUIDE · V1.0 · OCTOBER 2026

Trosheen website kit

How to put the brand on trosheen.shop: fixes, head tags, styles, components, images, motion, seasons and copy. Matches Brand book v3.1.

MADE TO BE HANDED DOWN · RADĪTS, LAI NODOTU TĀLĀK

For: whoever builds or updates trosheen.shop **Version:** 1.0 · matches Brand book v3.1 (October 2026) **Live demo:** open `13-code/example-homepage.html` in a browser. It shows the header, hero, trust strip, collections, product cards, story, signature, newsletter and footer working together, using only files from this kit.

0. Start here: do these first

These problems exist on the site today (see the audit, brand book p. 16). Fix them before the visual update.

#	PROBLEM TODAY	FIX
1	Shop shows "0 darbi" and "An error occurred". The hero button leads to an empty shop.	Publish the real pieces. Until then, show the designed empty state (§7.4) and remove the raw error messages.
2	"Design Yours" → `/constructor` returns 404.	Point it to a simple custom-order form (`/pasutijumi`) or the contact page.
3	Shop, gallery and journal footers show `hello@trosheen.crafts` and `+371 XXX XXXXX`.	Use one shared footer with **slaff.trosheen@gmail.com** and **+371 20 678 142** on every page.
4	Four spellings of the name.	Use **Trosheen** everywhere: header, footer, ©, page titles, care guide, emails.
5	Page title says "Handcrafted Concrete Art".	Use the new titles and descriptions (§2).

1. What's in the kit

```
Trosheen-Website-Kit/
├─ index.html                ← visual overview of everything (open in a browser)
├─ IMPLEMENTATION-GUIDE.pdf / .md
├─ 01-brand-book/            Brand book v3.1 (39 pages)
├─ 02-logos/                 seal, wordmark, horizontal + stacked lockups · 5 colours · SVG + PNG,
transparent
├─ 03-favicon-app-icons/     favicon.ico/.svg, 16–512 px, apple-touch, maskable, social avatar
├─ 04-icons/                 46 line icons · SVG (currentColor), sprite, PNG Spruce/Linen
├─ 05-heroes/                full-width homepage heroes (desktop, wide, 2× mobile)
│  ├─ no-text/               same photos without text (recommended for the live site)
│  └─ web/                   resized WebP + JPG ready to upload
├─ 06-banners-and-sections/  5 collection banners, about bands, trust strip, newsletter, email
header (+ web/)
├─ 07-social-sharing/        share image 1200×630 (with and without text)
├─ 08-motion-lottie/         11 interface animations (12 files)
├─ 09-botanical-line-art/    fern, lilac, birch, oak, lily + 2 dividers · SVG (draw on scroll),
Lottie, PNG
├─ 10-seasons/               4 seasons: ornament, ambient Lottie, banner, lines (seasons.json)
├─ 11-signature/             "Ar siltām rokām, Oļegs" etc. · self-animating SVG, Lottie, PNG
├─ 12-marketing-materials/   Instagram, carousel, product card, story, gift packaging, poster,
business cards
├─ 13-code/                  trosheen.css, trosheen.js, head-snippet.html, site.webmanifest,
example-homepage.html
├─ 14-fonts/                 Fraunces, Jost, Caveat (signature only) + OFL licences
├─ vendor/                   lottie.min.js (for the offline demo and index only)
└─ previews/                 motion previews (MP4) and the animation concept board
```

Suggested server layout:

KIT FOLDER	UPLOAD TO
`13-code/trosheen.css`	`/css/`
`13-code/trosheen.js`	`/js/`
All `.json` animations from 08, 09/lottie, 10, 11	`/lottie/`
Images	`/img/`
Favicons + `site.webmanifest`	site root
Share image	`/og/`

2. `<head>`: name, titles, sharing, icons, fonts

Paste `13-code/head-snippet.html` into every page's `<head>`. It contains the title and description, theme colour, sharing tags, icons, fonts, the brand CSS and the brand JS.

FIELD	LATVISKI (DEFAULT)	ENGLISH (`/EN/`)
Title (home)	Trosheen — roku darbi mājai un dārzam no Daugavpils	Trosheen — handmade home & garden pieces from Latvia
Description	Unikāli akmens, ģipša un jaukto materiālu darbi, ar rokām veidoti ģimenes darbnīcā Daugavpilī. Radīts, lai nodotu tālāk.	One-of-a-kind stone, gypsum and mixed-media pieces, made by hand by a family workshop in Daugavpils. Made to be handed down.
Other pages	`<Page name> — Trosheen`	`<Page name> — Trosheen`

- `theme-color` becomes **#24412F** (today it is `#ffffff`).
- `og:image`: upload `07-social-sharing/trosheen-social-share-1200x630.jpg` and use its absolute URL.
- Add `<link rel="alternate" hreflang="lv">` and `hreflang="en"` once the EN version exists.
- **Fonts:** body text currently uses **Inter**; replace it with **Jost**. Headlines already use Fraunces. The Google Fonts link in the snippet includes Latvian and Polish characters. To self-host instead, use the files in `14-fonts/` (open licence).

3. Colours, type and spacing (`trosheen.css`)

All values are CSS variables at the top of `trosheen.css`. Replace the site's current colours with them:

TODAY	REPLACE WITH
text `#241E19`	`--tr-basalt #1F1D1A`
background `#F8F6F2` / `#FBFAF8` / white	`--tr-linen #F2EDE3`
nav grey `#6A6058`	`--tr-spruce #24412F`
font Inter	`--tr-font-body` (Jost)

Contrast rules (WCAG AA, checked):

PAIR	CONTRAST	USE
Linen on Spruce	9.6 : 1	Any text
Basalt on Linen	14.4 : 1	Any text
Linen on Kiln	5.1 : 1	Any text
Basalt on Lichen	5.6 : 1	Any text
Gilt on Basalt	5.8 : 1	Any text
Gilt on Spruce	3.9 : 1	Large text and buttons only
Gilt or Lichen on Linen	2.5 / 2.6 : 1	**Never** for text

Type scale:

STYLE	FONT AND WEIGHT	SIZE	CLASS / ELEMENT
H1	Fraunces 340	44 → 72 px	`h1`
H2	Fraunces 360	34 → 48 px	`h2`
H3	Fraunces 420	26 px	`h3`
Body	Jost 350	18 / 1.6	body text
Eyebrow	Jost 500, +0.24em, caps, Kiln	13 px	`.tr-eyebrow`
Button	Jost 500, +0.1em, caps	14 px	`.tr-btn`

Spacing: an 8 px rhythm (8 · 16 · 24 · 40 · 64 · 96 · 144). Containers are 1280 px wide; sections use 96 px vertical padding (`.tr-section`).

4. Logo usage

PLACE	FILE	SIZE
Header	`02-logos/svg/trosheen-lockup-horizontal-spruce.svg`	46 px high (38 px when scrolled, 36 px on mobile)
Footer (on Spruce)	`trosheen-lockup-stacked-linen.svg` or `-horizontal-linen.svg`	120–140 px high
Small spaces	`trosheen-seal-spruce.svg`	48 px minimum
Below 48 px	the T app icon (`03-favicon-app-icons/favicon.svg`)	—

- **Clear space:** ¼ of the seal's width on every side.
- **Colours:** use only the 5 provided colour files. Never stretch the logo, add effects, or place it on a busy part of a photo.
- **Alt text:** `alt="Trosheen"` on every logo image.

5. Page structure

5.1 Header (`.tr-header`)

- **Order:** logo (left) · navigation (centre) · search, account, wishlist, bag icons and **LV · EN** (right).
- **Menu (LV):** Veikals · Kolekcijas · Individuāli pasūtījumi · Mūsu stāsts · Žurnāls · Kopšana · Kontakti.
- **Active page:** add `aria-current="page"` to the link. A Gilt underline appears automatically.
- **Scrolling:** the header shrinks from 96 to 72 px (handled by `trosheen.js`). On mobile below 960 px, the menu collapses behind the `menu` icon.

5.2 Homepage: five sections, in this order

1. **Hero:** full-width photo with live text and real buttons (§6.1), plus the ripple scroll cue (`trosheen-06-fountain-ripple.json`).
2. **Trust strip (`.tr-trust`):** five HTML items with icons. Don't use the PNG on the site; it is for email and social.

ICON	TITLE	SUBTITLE
`handmade`	Veidots ar rokām	Daugavpilī, Latvijā
`one-of-a-kind`	Katrs darbs	vienīgais tāds
`natural-materials`	Dabīgi minerāli	akmens, ģipsis un citi
`parcel`	Rūpīgi iepakots	un nosūtīts ar rūpēm
`secure-payment`	Droša apmaksa	vienkārši un droši

3. **Collections:**

- The eyebrow and heading become "Šīs sezonas izlase / Izvēlētās kolekcijas", replacing the English "Current edit".

- Use two or three collection banners, then a row of product cards.

4. **Story band:**

- Mūsu ģimenes stāsts with a botanical drawing and the animated signature.

- It links to the story page.

5. **Newsletter (`.tr-dark`):**

- "Vēstules no darbnīcas" with the candle animation.

- **Footer:** Spruce background, stacked Linen logo, links, real contact details, legal links.

Remove from today's homepage: - the repeated story sections - the "30+ / 3 / 2K+" statistics row and the "Nulle" block, unless you can show proof - the English "Current edit" block

5.3 Other pages

PAGE	WHAT CHANGES
Veikals	Product cards (§7.2). "Tikai pieejamie" filter on by default. Empty state from §7.4. Filter labels in Latvian.
Product page	4:5 photos in true colour. Material eyebrow in Kiln, name in Fraunces, price in Jost 500. Add-to-cart and wishlist animations. "Vienīgais eksemplārs" badge on one-off pieces.
Individuāli pasūtījumi	Replaces `/constructor`. Form fields: krāsa, apdare, aromāts, izmērs, ziņa. When the form is sent, play `trosheen-01-seal-stamp-once.json`.
Mūsu stāsts	Keep the existing copy. Add botanical drawings in the margins and the signature after Oļegs' section. Hero: `06-banners-and-sections/…about-page-hero`.

PAGE	WHAT CHANGES
Žurnāls (was "Darbnīcas piezīmes")	Until there are posts, hide it from the menu or show the empty state.
Kopšana	Add seasonal tabs. The winter tab uses `trosheen-09-frost-to-drop.json`. Translate "MATERIAL QUALITIES" → "MATERIĀLA ĪPAŠĪBAS" and "TROSHEEN MATERIAL PHILOSOPHY" → "TROSHEEN MATERIĀLU FILOZOFIJA".
Galerija	Fold it into the story and product pages until it has content. Translate the filters: Foto · Video · Produktu foto.
Kontakti	Keep the "kā ģimenes darbnīca, nevis zvanu centrs" promise. Use form fields from §7.3.
404	`trosheen-10-404-rolling-stone.json` + "Šī darba šeit nav" + a "Uz sākumu" button.
Checkout success	`trosheen-08-wrapped-and-sealed.json` + "Paldies!" + the signature "Ar siltām rokām, Trosheen ģimene".

6. Images

6.1 Hero: full width, live text, no baked-in buttons

- Use the **no-text** files from `05-heroes/web/` and write the headline, text and buttons in HTML. This keeps them translatable, readable by search engines, accessible, and lets the buttons work.
- The versions with text are for social media, presentations and email.
- Art-direct with `<picture>`:
- desktop: `…desktop-1920x1080-no-text-{960,1280,1920}w.webp`
- mobile: `…mobile-1080x1920-a-no-text-{720,1080}w.webp`
- Preload the desktop 1920w image, and set `fetchpriority="high"` on the hero `<img>`.
- **Text position:** bottom right on desktop, bottom left on mobile. `trosheen.css` adds the soft dark shade behind it.
- The full markup is in `example-homepage.html`.

```
<section class="tr-hero">
  <picture>
    <source media="(max-width:760px)" type="image/webp"
            srcset="/img/trosheen-home-hero-mobile-1080x1920-a-no-text-720w.webp 720w,
                    /img/trosheen-home-hero-mobile-1080x1920-a-no-text-1080w.webp 1080w"
sizes="100vw">
    <source type="image/webp"
            srcset="/img/trosheen-home-hero-desktop-1920x1080-no-text-960w.webp 960w,
                    /img/trosheen-home-hero-desktop-1920x1080-no-text-1280w.webp 1280w,
                    /img/trosheen-home-hero-desktop-1920x1080-no-text-1920w.webp 1920w"
sizes="100vw">
    <img src="/img/trosheen-home-hero-desktop-1920x1080-no-text-1920w.jpg" alt="Trosheen roku darbi
dārzā"
         width="1920" height="1080" fetchpriority="high">
  </picture>
  <div class="tr-season-ambient" aria-hidden="true"></div>
  <div class="tr-hero__content">
    <p class="tr-eyebrow">Roku darbs · Daugavpils, Latvija</p>
    <h1>Radīts, lai<br>nodotu tālāk.</h1>
    <hr class="tr-rule">
    <p>Unikāli akmens, ģipša un jaukto materiālu darbi mājai un dārzam — ar rokām veidoti mūsu
ģimenes darbnīcā.</p>
    <div class="tr-hero__actions">
      <a class="tr-btn tr-btn--gilt" href="/veikals">Skatīt veikalu</a>
      <a class="tr-btn tr-btn--secondary" href="/stasts">Mūsu stāsts</a>
    </div>
  </div>
  <div class="tr-hero__scroll" data-lottie="trosheen-06-fountain-ripple.json" data-play="loop"
aria-hidden="true"></div>
</section>
```

6.2 Collection banners and sections

- Banners are 1920×640 with a colour panel, already designed with text. Use them as images inside a link.
- **Alt text:** write the banner's headline as the alt text.
- **Sizes:** `06-banners-and-sections/web/` has full and half widths (WebP + JPG).
- **Mobile:** below 760 px, show the product photo or a product grid instead. The panel text gets too small.

6.3 Photo rules (non-negotiable)

- Real pieces only, in their true colour. Never recolour, desaturate or swap in pieces you don't make.
- Text and logos never sit over a piece.
- **Alt text** describes the piece, for example `alt="Ar rokām apgleznots ģipša svečturis ar zelta pārslām"`.

---

7. Components

7.1 Buttons

CLASS	USE
`.tr-btn.tr-btn--primary`	Spruce. Main action on Linen.

CLASS	USE
`.tr-btn.tr-btn--secondary`	Outline. Second action.
`.tr-btn.tr-btn--gilt`	Main action on Spruce or on photos.
`.tr-link`	Text links. Gilt underline draws on hover.

- One primary button per section.
- Buttons are 56 px high, and the focus outline is always visible.
- **Labels (LV):**
- Skatīt veikalu, Mūsu stāsts, Pievienot grozam
- Pieteikt pasūtījumu, Pierakstīties, Lasīt vairāk, Uz sākumu

7.2 Product card (`.tr-card`)

```
<article class="tr-card">
  <div class="tr-card__media"><img src="…" alt="…" loading="lazy" width="900" height="1125"></div>
  <span class="tr-badge">Vienīgais eksemplārs</span>
  <button class="tr-card__wish" data-wishlist aria-pressed="false" aria-label="Pievienot vēlmju
sarakstam">
    <div data-lottie="trosheen-03-wishlist-heart.json" data-play="manual"
style="width:44px;height:44px"></div>
  </button>
  <div class="tr-card__body">
    <div class="tr-card__material">Ģipsis · roku apgleznojums</div>
    <h3 class="tr-card__name">…</h3>
    <div class="tr-card__price">€ …</div>
    <button class="tr-btn tr-btn--primary" data-add-to-cart>Pievienot grozam
      <span data-lottie="trosheen-02-add-to-cart.json" data-play="manual"
style="width:28px;height:28px"></span></button>
  </div>
</article>
```

- Photos are 4:5.
- **On hover:** the card lifts 4 px and the photo zooms slowly to 104%.

7.3 Forms

```
<div class="tr-field">
  <label for="email">E-pasts</label>
  <input id="email" type="email" autocomplete="email">
  <!-- on error: add .tr-field--error to the wrapper and <p class="tr-field__error">…</p> -->
</div>
```

Labels always sit above the field; never use a placeholder as the only label. Errors appear in Kiln.

7.4 Empty, error and 404 states

STATE	ANIMATION	HEADING	TEXT	BUTTON
Empty shop	`trosheen-11-empty-shop-plant.json` (loop)	**Plaukti atpūšas**	Mēs pašlaik veidojam jaunus darbus. Tikmēr pastāstiet, ko vēlaties — izveidosim to jums.	Individuāls pasūtījums
Load error (replaces "An error occurred")	`info` icon	**Kaut kas aizķērās**	Šo lapu neizdevās ielādēt. Lūdzu, mēģiniet vēlreiz vai rakstiet mums.	Mēģināt vēlreiz
404	`trosheen-10-404-rolling-stone.json` (view)	**Šī darba šeit nav**	Lapa varētu būt pārvietota. Darbnīca un veikals ir savās vietās.	Uz sākumu

7.5 Icons

Inline the sprite (`04-icons/trosheen-icons-sprite.svg`) once after `<body>`, then use:

```
<svg class="tr-icon" aria-hidden="true"><use href="#tr-bag"/></svg>
```

- **Accessibility:** icon-only links and buttons need an `aria-label`, for example `aria-label="Grozs"`.
- **Colour:** icons take the text colour, so they are always Spruce on Linen or Linen on Spruce.
- Never mix in other icon sets or emoji.

8. Motion

8.1 Principles

- One calm thing moves at a time.
- Use ease-in-out curves, short distances and no bounce.
- Motion never blocks a task.
- Every animation has a finished still state for visitors who turn motion off. `trosheen.css` and `trosheen.js` handle this automatically.

TOKEN	VALUE	USE
`--tr-dur-hover`	200 ms	buttons, links, icons
`--tr-dur-base`	400 ms	header, cards, menus
`--tr-dur-reveal`	600 ms	headlines/images fading up
`--tr-dur-draw`	1600 ms	botanical line art
`--tr-ease-calm`	cubic-bezier(.45,0,.2,1)	default
`--tr-ease-enter`	cubic-bezier(.2,.7,.2,1)	things appearing

8.2 Scroll reveal

- Add `data-reveal` to headlines, text and images. They fade up 16 px when they scroll into view.
- `data-reveal="1"`, `"2"` and so on add an 80 ms stagger.
- Use it on a few elements per section, not on everything.

8.3 Lottie animations: one attribute, no custom code

Load `lottie_light.min.js` (already in the head snippet), set `LOTTIE_PATH` in `trosheen.js` (default `/lottie/`), then add a slot:

```
<div data-lottie="trosheen-07-botanical-imprint.json" data-play="view"
style="width:64px;height:64px"></div>
```

DATA-PLAY	BEHAVIOUR
`loop`	Loops (loader, candle, ripple, empty shop).
`view`	Plays once when 35% visible (signature, 404, success, imprint).
`hover`	Plays forward on hover and back on leave. Wrap the tile in `data-lottie-host`.
`manual`	You trigger it: `Trosheen.playOnce(el._lottie)`. Add-to-cart and wishlist are already wired via `data-add-to-cart` / `data-wishlist`.

FILE	WHERE	SIZE ON PAGE
`trosheen-01-seal-stamp-loop.json`	page/section loader	96–160 px
`trosheen-01-seal-stamp-once.json`	order confirmed, custom-order sent	120–160 px
`trosheen-02-add-to-cart.json`	inside the add-to-cart button	24–32 px
`trosheen-03-wishlist-heart.json`	wishlist button	32–44 px
`trosheen-04-sprouting-planter.json`	Dārzs category tile (hover)	64–96 px
`trosheen-05-living-candle.json`	Sveces category, newsletter	96–220 px
`trosheen-06-fountain-ripple.json`	hero scroll cue, fountains	48–64 px
`trosheen-07-botanical-imprint.json`	"one of a kind" trust item, loaders	44–96 px
`trosheen-08-wrapped-and-sealed.json`	checkout success	120–160 px
`trosheen-09-frost-to-drop.json`	Kopšana winter tab	44–64 px
`trosheen-10-404-rolling-stone.json`	404 page	140–200 px
`trosheen-11-empty-shop-plant.json`	empty shop	140–200 px

Performance: - The files are tiny: 3–7 KB each, about 53 KB for the seal. - `lottie_light` is enough. Load animations only on pages that use them. - Pause the ambient layer when it's off screen (already handled).

8.4 Botanical line art (draws on scroll)

Paste the SVG code of a file from `09-botanical-line-art/svg/` directly into the HTML. Keep `class="tr-botanical"` and the `pathLength="1"` attributes.

```
<svg class="tr-botanical tr-divider" viewBox="0 0 1200 80" …>…</svg>
```

- **Where:** section dividers (vine, meadow), story page margins, empty states.
- **How:** Spruce or Linen only, at 50–75% opacity. Never over a product.
- **Motion:** draws once and doesn't redraw when scrolling back.

8.5 Seasons of the courtyard

- `trosheen.js` sets `<html data-season="spring|summer|autumn|winter">` by month:
- Mar–May: spring
- Jun–Aug: summer
- Sep–Nov: autumn
- Dec–Feb: winter
- **Manual override:** set the attribute on `<html>` yourself, for example for a winter sale in March.
- **What changes:**
- **Accent rule:** `.tr-season-rule` under the header switches to the season colour (Lichen, Gilt, Kiln or Spruce).
- **Ambient layer:** put `<div class="tr-season-ambient" aria-hidden="true"></div>` inside the hero. It loads `trosheen-<season>-ambient.json` (lilac flowers, summer seeds, oak leaves or snow, 12 s loop, 55% opacity).
- **Season lines** (from `10-seasons/seasons.json`): `html <span data-season-only="spring">Ceriņi zied pie darbnīcas durvīm.</span> <span data-season-only="summer">Garas vasaras dienas pagalmā.</span> …`
- **Ornaments and banners:** `10-seasons/trosheen-<season>-ornament.svg` and `-banner-1920x120.png`, for announcement bars and emails.
- The logo, palette and type **never** change with the season. Use only one ambient layer per page, on the hero only.

8.6 Animated signature

WHERE	VERSION
Story page, after Oļegs' section	`trosheen-signature-ar-siltam-rokam-olegs.json`, `data-play="view"`, 150–200 px high
Order confirmed	`trosheen-signature-trosheen-gimene.json`
No-JavaScript option	`*-animated.svg` plays by itself (`<img src="…-animated.svg" alt="Ar siltām rokām, Oļegs">`)
Emails	`11-signature/*-spruce.png`

- **Accessibility:** add `role="img" aria-label="Ar siltām rokām, Oļegs"` to the animation's container.
- Show the signature once per page. The handwriting font (Caveat) is for the signature only.

9. Copy: Latvian first, English as a full twin

- **Claims:** keep "2K+ laimīgas mājas", "Nulle bez atkritumiem", "100% ekoloģisks" and "pārtikas klases" only if you can show proof for them.
- **Voice:** warm, calm, honest, crafted, quietly proud. Use short sentences, no exclamation marks in headlines, and no emoji.
- **Proofreading:** have a native speaker read the new Latvian lines before launch.

10. Beyond the website

- **Checkout and order emails:**
- sender name **Trosheen**
- header `06-banners-and-sections/trosheen-email-header-1200x360.png`
- signature PNG at the end
- **Social:**
- Rename Instagram and Facebook from `trosheencrafts` to Trosheen if the names are free, then update the links in the footer and the Brand Kit.
- Profile picture: `03-favicon-app-icons/social-profile-avatar-1080.png`.
- **Marketing:** the files in `12-marketing-materials/` are ready for Instagram, Facebook, packaging and print.

11. Launch checklist

Must - [ ] Shop shows real pieces, or the designed empty state. No raw error messages anywhere. - [ ] "Design Yours" / custom-order link works. - [ ] Real email and phone in every footer. - [ ] Name is "Trosheen" everywhere, including titles, ©, the guide and emails. - [ ] Head snippet on every page: titles, descriptions, share image, favicon set, theme colour. - [ ] Jost replaces Inter, and the colour tokens replace the old colours.

Should - [ ] Homepage rebuilt in five sections, with the no-text hero and live buttons. - [ ] Header, footer, buttons, cards and forms use `trosheen.css` classes. - [ ] Latvian label fixes applied, and EN twin written. - [ ] Animations wired: cart, wishlist, 404, empty shop, success, scroll cue.

Nice - [ ] Botanical dividers, seasons and the signature on the story page. - [ ] Seasonal announcement bar.

QA - [ ] Test on a phone (390 px), tablet and desktop. - [ ] Keyboard only: every button and link has a visible Gilt focus ring. - [ ] With "reduce motion" switched on, everything shows its finished state and nothing falls or loops. - [ ] Lighthouse: LCP image is the preloaded hero, and all images have width/height and alt text. - [ ] Share a link in Messenger/WhatsApp: the new title, description and image appear.

---

12. Rules that never change

- **Products:** real pieces in true colour. Never recolour, desaturate, replace or invent them.
- **Logo:** never redraw or recolour the seal, never stretch it, never put it over a piece.
- **Buttons:** no buttons inside images. Buttons are always live HTML.
- **Colour:** Gilt and Lichen are never text colours on Linen.
- **Brand names:** never use the old name or the old seasonal logos.

Questions about the brand: see Brand book v3.1. Questions about code: everything shown here is working in `13-code/example-homepage.html`.
